INSTALLATION TOOLS AND RECOMMENDATIONS

In order to install the plug properly, make a hole perpendicularly to the base support using the right drill bit. Before installing the plug make sure the hole is clean and all the drilling dust has been removed.

We recommend not to use an impact drill while making the hole on an hollow brick wall in order to prevent the internal bulkheads break.

Insert the plug and then the screw. Eventually, fasten nut and pipe clamp.

PACKAGING

In polyethylene bags
