

BABY SUMO 100 mm Square-based vibration-proof ground support

APPLICATION

Ground supports for air-conditioning outdoor units.

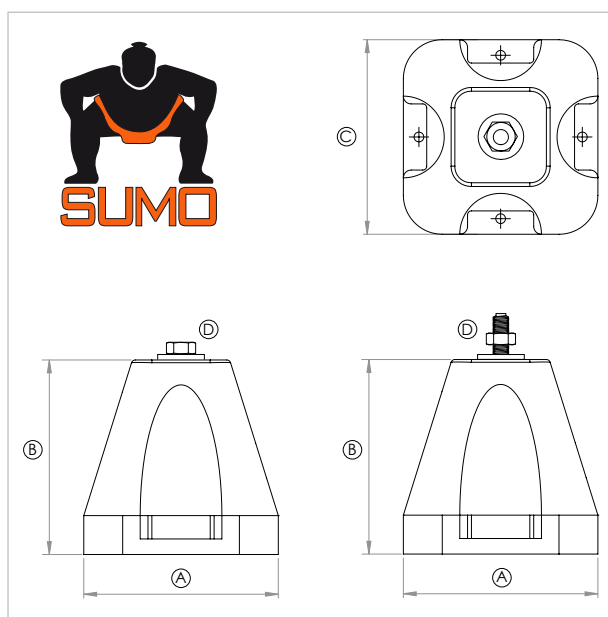

FEATURES AND BENEFITS

- > It is made by the **recycling of discarded car tires**. The transformation process - applied to prepare the rubber for reuse - consists of 3 main steps:
 1. Metal removal;
 2. Tyre destruction to obtain rubber shavings;
 3. Further grinding to get gum powder.
 Thanks to this transformation we are able to **recover up to 70% of the rubber** the tyres are made of. Moreover, once the ground support is at the end of life, its rubber can be recycled again.
- > **Mini vibration-proof support** that is made of a blend of **SBR vulcanized rubber**, UV stabilized.
- > Its support surface is **wide and free from ribs** in order to make the item **sound-proof and skid-proof**.
- > Its solid structure - together with the weight of the installed unit - **prevents seepages and water stagnation**.
- > **Complete with fixing kit and level** to install the outdoor air-conditioning unit properly.
- > Working temperature: **-40°C / +80°C**

Composed of:

- Moulded base support made of recycled rubber
- M10 hammer head screw or M10 female coupling with M10 hex head nut
- Level

COD	TYPE	Application	A	B	C	D
550201	BABY SUMO	Male coupling	100	100	100	M10
550202	BABY SUMO F	Female coupling	100	100	100	M10

COMPONENTS FOR AIR-CONDITIONING GROUND SUPPORTS

MATERIALS TECHNICAL DATA

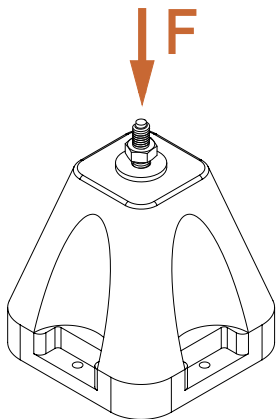

SUPPORT

SBR vulcanized rubber, made by recycling discarded car tires

FIXING KIT

Steel 4.8 DIN 933-8.8 with electro zinc-plating 7-8 µm EN ISO 12329

RECOMMENDED LOADS

TYPE	F
BABY SUMO	140
BABY SUMO F	140

F = concentrated load (in Kg)

PACKAGING

In cardboard box
